

ED.VOICETHREAD

One of the most broadly applicable learning tools available today, VoiceThread is the 21st century's number two pencil.

ED.VOICETHREAD *Learning²*

It's the obligation of 21st century educators to prepare students for this new economy, which means providing them with the skills to locate the most up-to-the-minute facts, and then turn those freshly acquired facts into solutions appropriate for the task at hand.

- Feb, 2011 The Journal - Transforming Education Through Technology

Ed.VoiceThread is a secure collaborative environment where students learn and practice the critical and lifelong skill of transforming acquired facts into solutions. Who is it for? From Pre-k through grade 12, special needs and advanced placement, and language study through the sciences. More than half of the students using VoiceThread are in fact no longer in K-12 at all, but instead are enrolled in some of the most prestigious graduate and post-graduate programs in the world, including Harvard, Johns Hopkins, UNC-Chapel Hill, Pepperdine, Penn State, and over 500 others.

The workplaces of the future are collaborative, anytime - anywhere environments, and the skills necessary to succeed require early academic exposure, continual support, and a lifetime commitment to mastery.

-
-
- ✓ Untethered anytime - anywhere participation for students and educators
 - ✓ An accountable and transparent creative environment
 - ✓ Quickly increases the engagement value of current curriculum
 - ✓ Increase accessibility through diversified content & participation modes
 - ✓ Simplified IT infrastructure by using a multi-platform Cloud Application

ED.VOICETHREAD

*District
Pricing*

District Pricing provides a significant discount off of published pricing for school subscriptions to Ed.VoiceThread. In addition, centralized policy, standards, and reporting contribute immensely to ensuring a successful roll-out.

|  | <i>Description</i> |
|---|---|
| Management Portal | Create, edit, and track user accounts. Manage organization level preferences and capture data about usage. The management portal can integrate with your authentication and information systems to keep management to a minimum. |
| Pro Educator Accounts | A Pro Educator account allows educators to create an unlimited number of VoiceThreads, create and manage groups, monitor and edit student work, and 10GB of account storage. |
| Student Accounts | A Basic account is given to all students, allowing them to create up to 50 VoiceThreads and has up to 2GB of account storage. |
| Archival Export Credits | A VoiceThread is a live and highly interactive discussion space that requires an internet connection. However, an Archival Export of the discussion can be ordered at any time, resulting in a downloadable video file that contains all the media and commentary. This video file can then be saved and played 'off-line'. |
| Phone Commenting Minutes | For users who have difficulty configuring their computer's microphone to record, phone commenting is a highly accessible option for voice recording. Remarkably simple to use, this method requires phone commenting minutes, which can be purchased in bulk by an institution and given to users as needed. |
| Authentication Integration | VoiceThread integrates with multiple authentication frameworks, allowing your organization to choose from an extensive number of options. Members of our Authentication Team are thorough and experienced authentication engineers. For comprehensive documentation, please contact us. |
| Student Information System Integration | Integrating VoiceThread with your Information Management System enables the automatic creation of Groups and the synchronization of user, role, and Group membership. This integration results in a tremendous improvement in the new users experience as well as reduces the required scope of training and |
| Training | VoiceThread Account Managers provide one-on-one and small-group webinars for Instructional Specialists and Administrators. These 1-hour sessions are customized for the institution and any of their unique requirements. |
| Custom Website | A custom domain name and customizable homepage enable an institution to showcase its best presentations and lectures, debates and discussions, portfolios and projects, all in one central and public location. |
| Support | There are three levels of support available: standard, enhanced, and premium. Details can be found on the Support Tiers Summary. Our Account Managers are knowledgeable and passionate problem solvers that deliver best-in-class support. |
| Advanced Security | District Administrators can require/enforce all the users within a district to transmit all content in an encrypted secure framework. In addition, default user session length can be set and controlled by administrators. |
