Unlimited Account Creation and Number of Active Users
During the term of the license you can provide access to all the students and faculty at your institution at no additional cost.

SSO Integrations
VoiceThread integrates with most learning management systems (Blackboard, Canvas, Moodle, Desire2Learn, etc.), Google Apps for Education, Shibboleth/CAS, and LDAP/Active Directory.

Zoom and Kaltura
Integrate and pull content from your Kaltura and/or Zoom accounts into VoiceThread seamlessly.

Universal App for Screen Readers
An App specifically designed for use with screen readers.

3rd party CC Services
Ability to add closed captioning to videos and comments, and integrate with third-party captioning services.

Automated Captioning Service
A fully automated system that creates machine captions for all audio and video media uploaded or created by an organization's members.

Support
Engage with VoiceThread's passionate and highly trained support team.

Exports
Download your VoiceThreads to view and save offline as a video file.

License Analytics
View usage trends and basic stats for all of your users.

Training Sessions
1-hour customized training sessions with a member of our instructional design and support team.

Customized Training Resources
VoiceThread's support and instructional design teams will work with you to generate the documentation you need to support your users.

Customized SLA
If your legal department requires a customized service agreement, our legal team will work with you to negotiate that.

Advanced Security Controls
Enforce session timeouts and prevent browsers from auto-completing VoiceThread login information.
